## Summary of Pertinent Data

Item	Fiscal Year 2014 - 2015	Fiscal Year 2015 - 2016
Parties to judgment	131	129
Active pumpers	66	76
Active non-parties	4	4
Allowed pumping allocation (acre-feet)	217,367	217,367
Water put into storage	3,500	6,728
Rainfall (inches)	7.66	8.61
Injection at the Alamitos Barrier project (acre-feet) <sup>4</sup>	4,710	4,409
Spreading operations (acre-feet) <sup>1</sup>	78,818	91,224
Watermaster expenses, per APA	\$1.96	\$1.81
<b>Watermaster expenses, total<sup>5</sup></b>	<b>\$425,700</b>	<b>\$394,503</b>
APA Extractions (acre-feet) <sup>2</sup>	178,982	182,760
Storage Extractions (acre-feet)	900	0
Recycled water use by parties (acre-feet)	12,115	13,558
Imported water use by parties (acre-feet) <sup>3</sup>	133,847	108,150
Exported water use by parties (acre-feet)	-2,830	-2,300
<b>Total water use by parties (acre-feet)</b>	<b>323,014</b>	<b>304,406</b>

<sup>1</sup> Provisional information from Los Angeles County Department of Public Works.

<sup>2</sup> Excludes extractions by parties with non-consumptive water use permits and by non-parties.

<sup>3</sup> Includes groundwater imported from the San Gabriel Basin.

<sup>4</sup> Includes injection only on the Los Angeles County portion of the Alamitos Barrier.

<sup>5</sup> For FY 2015-16, Water Rights Panel \$195,630, Administrative Body \$ 195,630.

# Introduction

The Central Basin Watermaster Service Area overlies about 227 square miles of the Central Basin (Basin) in southeastern Los Angeles County. Figure 1 shows the location and boundaries of the Central Basin Watermaster Service Area. The Watermaster Service Area is bounded by the Newport-Inglewood Uplift on the southwest, the Los Angeles-Orange County line on the southeast, and an irregular line that approximately follows Stocker Street, Martin Luther King Boulevard, Alameda Street, Olympic Boulevard, the boundary between the City of Los Angeles and unincorporated East Los Angeles, and the foot of the Merced Hills and Puente Hills on the north. Twenty-three incorporated cities and several unincorporated communities are found within the Watermaster Service Area. Groundwater from the Basin provides a substantial portion of the water supply needed by the residents, businesses, and industries in the area overlying the Basin.

More than 60 years ago, groundwater overdraft and declining water levels in the Basin threatened the area's groundwater supply and caused the intrusion of sea water into the southern part of the Basin. However, timely legal action and adjudication of the water rights halted the overdraft and helped to prevent further damage to the Basin. Since that time, groundwater extraction from the Basin is limited to the amounts set by a Superior Court Judgment and is monitored by a Court appointed Watermaster.

The Watermaster assists the Court in the administration and enforcement of the provisions of the Judgment and consists of three separate arms with different functions.

The first arm is the Administrative Body, to administer the Watermaster accounting and reporting functions. The Water Replenishment District of Southern California was appointed by the court to fulfill this role.

The second arm is the Water Rights Panel which enforces issues related to the pumping rights within the adjudication. The Water Rights Panel is made up of seven water rights holders who are selected through election. Current members of the Water Rights Panel are the City of Downey, Golden State Water Company, City of Lakewood, City of Long Beach, Montebello Land and Water Company, City of Signal Hill and the City of Paramount.

The third arm is the Storage Panel which is comprised of the Water Rights Panel and the WRD Board of Directors, which together approve certain groundwater storage efforts. This 2015-2016 Watermaster Report, developed by the Administrative Body and adopted by the Central Basin Water Rights Panel, provides information on groundwater extractions, storage accounts, use of imported water and recycled water, replenishment operations, and the budget and finances of Watermaster during the 2015-2016 fiscal year.

# Water Use

## A. Allowed Pumping Allocation Extractions by Parties

The Judgment limits the amount of groundwater each party may extract annually from the Basin. This limit, referred to as the Allowed Pumping Allocation (APA), is shown in Table 1 for each party. A recipient of Exchange Pool water may pump the amount released to it in addition to its APA. The volume of water extracted from most wells is reported monthly. Table 2 lists, by party, the volume of groundwater extracted each month from each active well in the Basin. Figure 1 shows the pattern of groundwater extractions during 2015-2016.

To provide flexibility in the control of groundwater extractions, the Judgment contains provisions allowing each party to carry over into the succeeding administrative year a portion of its unused APA and in some cases to over extract. This flexibility was necessary to meet unforeseen water demand.

One provision allows each party to carry over from one administrative year to another any unused APA. For 2015-2016, the amount of carryover available to each party was the greater of i) 50% of its APA or 20 acre-feet, whichever is larger, less the quantity of water in a parties storage account or ii) 20% of a party's APA. In addition, any unused Exchange Pool water can be carried over into the following fiscal year.

## B. Groundwater Storage Activity by Parties

The Third Amended Judgment permits parties holding water rights to store water in the Central Basin for later recovery. During 2015-2016, 6,728.07 acre-feet of water was put into storage and none was extracted or transferred.

All of this water was put into storage pursuant to Section III.A.(2) of the Third Amended Judgment, which allows parties to convert carryover to storage upon payment of the Replenishment Assessment to WRD.

## C. Regional Disadvantaged Communities Incentive Program

Section II.H of the Third Amended Judgment contains provisions for the development of a Regional Disadvantaged Communities Incentive Program (RDCIP) that allocates 23,000 acre-feet of storage space for the use or benefit of disadvantaged communities. This storage must be used to benefit Disadvantaged Communities (DAC) within the Central Basin. A DAC is defined as any area that is served by a Water Purveyor and consisting of one or more contiguous census tracts which, based

upon the most recent U.S. Census data, demonstrates a median household income which is less than eighty percent (80%) of the median household income for all Census Tracts within the State of California. This program was developed by the Water Rights Panel during 2014-2015 and approved by the Court in June 2015.

There were no requests for participation in the RDCIP in 2015-2016.

#### **D. Overextractions**

The Judgment provides for overextractions under certain conditions. A party may over extract by 20 percent of its APA or 20 acre-feet, whichever is greater. When a party overextracts in violation of the Judgment, Watermaster notifies the party to resolve the overextraction issue. Under certain circumstances, a party may overextract in a greater amount; however, prior approval must be obtained from the Watermaster. The overextraction must be made up in the following administrative year unless Watermaster concludes that to require the party to make up the overextraction would create an unreasonable hardship for the party. In such cases, Watermaster may grant relief from the requirement that the party must make up the overextraction in the following year, such as prorating the reduction in the party's APA over a period of up to five years.

Table 7 lists the names of parties that have over extracted groundwater during the year and shows the amount of overextraction by each party. During 2015-2016, four parties had a combined cumulative overextraction of 24,212.47 acre-feet. The table also identifies one party, State of California (CalTrans), that has over extracted in violation of the Judgment. Since 1997-1998, CalTrans has been pumping groundwater for dewatering beneath the 105 freeway in Downey. CalTrans extracted 23,851.21 acre-feet of water during 1997-1998 through 2014-2015 and 342.76 acre-feet in 2015-2016.

#### **E. Extractions by Non-parties**

Table 8 shows extractions by non-parties totaled 6.80 acre-feet. Extractions by non-parties are shown by well and by month in Appendix A.

#### **F. Extractions of Contaminated Groundwater**

Any party may petition the Water Replenishment District of Southern California (WRD) for a Non-consumptive Water Use Permit (NCWUP) as part of a project to remedy or ameliorate groundwater contamination. If the petition is granted, the party may extract the groundwater without the production counting against its production rights. Table 9 lists current Non-consumptive Water Use Permits issued by WRD and the amounts of groundwater extracted under those permits. A total of 86.23 acre-feet of water was extracted under NCWUP's in 2015-2016.

## **G. Allowed Pumping Allocation Transfers**

Each year, APAs are transferred between parties through sales and leases. Table 6 shows the succession of APAs in the Basin as of June 30, 2016. Sales have reduced the number of parties from 508 in 1966-1967 to 129 in 2015-2016.

Table 10 shows transfers of APAs through leases and Table 11 shows transfers of APA through sales and purchases. During 2015-2016 there were four sales of APAs that totaled 920 acre-feet and 65 leases that totaled 26,715.04 acre-feet. Each party's APA, as of June 30, 2016, is also shown in Table 1.

When land is sold on which a water right has been developed, the Watermaster must be furnished a copy of the sale document if the water right is also sold. The water right does not pass to the new land owner unless the sale document specifies that the water right was sold with the land. For the proper accounting of the water right, the sale document must specify the exact amount of water right.

In transferring water rights, parties must specify (1) the type of right (i.e., APA, normal carryover, or drought carryover), (2) the amount of right to the nearest 0.01 acre-foot, and (3) the period of the lease, if applicable. Moreover, all leases must be made on a fiscal year basis and must be executed by the parties and received by Watermaster by June 30 of the year in which the lease is effective. For parties wanting to buy, sell, or lease water rights, Watermaster maintains a web page. Any party wishing to be listed should call the Watermaster. This is a courtesy to assist parties unable to resolve problems regarding a surplus or deficiency of water supply. Watermaster will make no recommendation regarding transactions conducted relative to the use of this service.

## **H. Storage Transfers**

The Judgment provides for the transfer of stored water between parties. There were no transfers of stored water during 2015-2016.

## **I. Exchange Pool**

The Judgment authorizes an Exchange Pool to provide additional water rights to parties without sufficient water. If a party's estimated water requirement for the following fiscal year exceeds its total available water supply, that party may request additional water from the Exchange Pool. Any party wishing to purchase water from the Exchange Pool must file the request with the Watermaster before April 1. If no requests are received by April 1, the Exchange Pool will not operate in the following fiscal year, and Watermaster will not process Exchange Pool forms. Table 12 shows that there were no requests for Exchange Pool water during 2015-2016.

## **J. Status of Extraction Wells**

In the Basin there are 292 reported active extraction wells and 231 reported inactive extraction wells (Appendix A). The locations of the active extraction wells are shown on Figure 1. Table 13 shows no new extraction wells were completed Table 14 shows that 2 extraction wells were destroyed.

## **K. Meter Testing Program**

Accurate measurement of groundwater extractions is essential for the successful management of groundwater in the Basin. Therefore, Watermaster requires an operative water meter to be installed at each extraction well. It is the responsibility of each party to ensure that its meter and test facilities are installed properly and are maintained in good working condition. It is the goal of Watermaster to test the water meter at each active extraction well at least once every two years or when a party requests a meter calibration. Watermaster tests meters by volumetric or pitot comparisons. Watermaster notifies a party that it must repair or replace its meter when the meter registers beyond 5 percent accuracy. Watermaster calculates the monthly water production for each well using the meter readings and Unit of Measure Code reported for the well that month. If the registration accuracy of the meter deviates by as much as 10 percent, the calculated well production could be subject to revision.

During 2015-2016, the Department of Water Resources, acting as Watermaster, visited 50 parties and tested 231 meters. Tests showed that 1 meter was more than 5 percent fast, with registration accuracies of plus 8 percent to plus 32 percent. No meters were found slow below 5 percent.

# Water Supply

## A. Precipitation

Because layers of materials of low permeability overlie the primary water-producing aquifers throughout much of the Basin and largely impermeable surfaces (i.e., pavement and buildings) cover most of the forebay areas, precipitation over the Basin has relatively little direct influence on the replenishment of the groundwater in the Basin. However, during years of high rainfall, increased runoff from the areas upstream of the Basin would result in increased replenishment to the Basin and would probably result in decreased water demand by the water users overlying the Basin which, in turn, could result in lower rates of groundwater extraction from the Basin.

During 2015-2016, the following amounts of precipitation were measured at five precipitation stations: 7.97 inches at Los Angeles-RD241 (formerly 96th and Central), 7.34 inches at Montana Ranch, 9.64 inches at USC, 8.42 at La Mirada Station, and 9.67 inches at Imperial Yard. Note that data for the Whittier City Yard station is not included in the 2015-2016 report due to a gap in the data. Figure 2 shows the locations of these precipitation stations, and Figure 3 shows the monthly average of the rainfall measured at these stations. Based on the rainfall measured at these stations, the mean precipitation over the Central Basin was 8.61 inches, which is 63 percent of the long-term mean precipitation at these stations.

## B. Groundwater Recharge

Natural replenishment of the groundwater in the Basin is largely from surface flow and underflow through Whittier Narrows from the San Gabriel Valley. As mentioned above, little of the rainfall over the Basin would be likely to infiltrate into deeper aquifers of the Basin.

Intentional replenishment of groundwater in the Basin is accomplished by spreading water at the Rio Hondo and the San Gabriel River spreading grounds in the Montebello forebay (Figure 2). The sources of this replenishment water include local storm runoff, purchased imported water, and recycled water from three reclamation plants located upstream of the Basin. Table 15 shows the sources and quantities of water spread to replenish the groundwater.

## C. In-Lieu Replenishment

During the 1965-1966 water year, WRD, in cooperation with the Metropolitan Water District of Southern California (MWD), began an in-lieu replenishment program. WRD may contract with any producer having access to supplemental water that could be used in lieu of extracting groundwater from the Basin.

In 2015-2016, WRD did not offer the in-lieu replenishment program to Central Basin water rights holders.

#### D. Imported Water

Water is imported from northern California via the State Water Project and from the Colorado River and is made available to water users by MWD through its member agencies: Central Basin Municipal Water District (CBMWD) and the Cities of Compton, Long Beach, and Los Angeles. The City of Los Angeles also imports water from the Owens River-Mono Basin, and the California Domestic Water Company, the San Gabriel Valley Water Company, the Suburban Water Systems, and the City of Whittier import groundwater from the San Gabriel Valley groundwater basin, which lies to the northeast and upstream of the Basin. Table 17 shows that in fiscal year 2015-2016, a total of 96,539 acre-feet of water was imported to the area overlying the Central Basin for potable use. In addition, the Water Replenishment District of Southern California (WRD) purchased 23,961 acre-feet of spreading water from the Metropolitan Water District of Southern California.

#### E. Quality of Imported Water

The table below summarizes MWD’s imported water quality for injection, spreading, and potable use. In 2015-2016, only State Water Project water was used for spreading, while injection and potable demands were met with a blend of Colorado River and State Water Project Water.

Constituent	Colorado River Water <sup>4</sup> (mg/L)	State Water Project Water <sup>5</sup> (mg/L)
Chloride	82	74
Sulfate	220	44
Hardness (as CaCO <sub>3</sub> )	270	110
Total Dissolved Solids	590	280

<sup>4</sup> At Lake Mathews - from 2015 MWD Annual Water Quality Report

<sup>5</sup> At Castaic Lake - from 2015 MWD Annual Water Quality Report

## **F. Recycled Water**

Table 18 shows that 13,996 acre-feet of recycled water was used in the area overlying the Basin during 2015-2016. This amount is 1,216 acre-feet more than was used in 2014-2015. These amounts do not include the recycled water used to replenish groundwater in the Basin.

## **G. Exported Water**

California-American Water Company exported 2,299.84 acre-feet of groundwater from the Basin to its service area that overlies a portion of the West Coast Basin.

## **H. Alamitos Seawater Intrusion Barrier Project**

Sea water intrusion in the Alamitos Gap near the mouth of the San Gabriel River poses a threat to the groundwater in the Central Basin. The Alamitos Barrier Project is designed to prevent sea water intrusion into the fresh water aquifers of the Basin. The location of the barrier is shown on Figure 2.

The Los Angeles County Department of Public Works operates the barrier project, which is comprised of four extraction wells that can be used to create a groundwater and 43 injection wells that create a groundwater ridge to halt sea water intrusion. In addition, the project includes 220 observation wells that are used to monitor groundwater levels and quality in the area. Table 19 shows the quantities of imported water and of recycled water injected into the barrier wells. The sea water intrusion problem has been contained by the barrier project.

## **I. Groundwater Levels**

Figure 2 shows the locations of selected wells that are used to monitor groundwater level elevations. Figure 4 shows the water level elevations in key wells located in the Montebello forebay, and Figure 5 shows the water level elevations in wells perforated in the principal water producing aquifers in the Basin.

# Watermaster Administration Costs and Budget

The Watermaster budget for 2015-2016 was \$394,503. This amount is composed of the Water Rights Panel budget of \$195,630 and the Administrative Body budget of \$195,630. A summary of the 2014-2015 budget is provided in Table 20.

Table 1 - Water Rights Accounting (acre-feet)

1 See Table 10 and Table 11 and Appendix B for information concerning leases, transfer of water right entitlements or prior ownership. Lease with flex includes carryover provisions.  
 2 Allowable Extraction = Allowed Pumping Allocation + Carryover + Leases.  
 3 Balance = Allowable Extraction - Amount Pumped - Carryover Conversion.  
 4 Includes the sale of 20 acre feet of normal carryover between the City of Cerritos and Farmers & Merchants Trust Co. of Long Beach.  
 5 Sale of 120 acre-feet of APA rights was subject to a FY 2015-16 lease from Aqua Capital to Golden State Water Company.  
 6 Includes the sale of 120 acre-feet of normal carryover from Puente Basin Water Agency to Rowland Water District.  
 7 Includes 3,646 acre-feet of increased extraction (pursuant to Section IV(K) of the Central Basin Judgement).  
 8 Sale of 690 acre-feet of APA rights was subject to a FY 2015-16 lease from Aqua Capital to Golden State Water Company.
